## SUSTAINABILITY

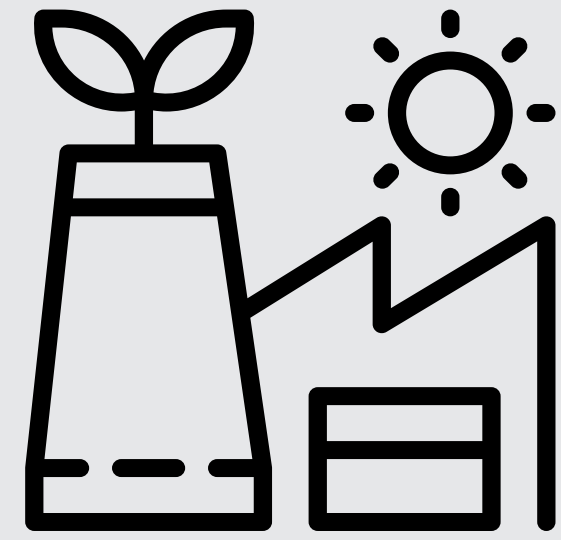

# 100% Recycled

At ONIX, we see mosaics as a symbol of sustainability. Crafted entirely from 100% recycled glass, our mosaics embody a circular economy model that preserves natural resources and minimizes environmental impact/footprint.

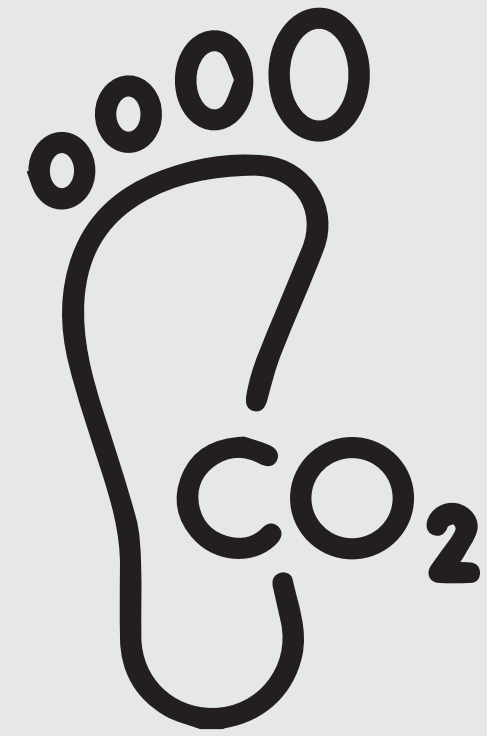

# 100% electric manufacturing process

We've adopted a fully electric and sustainable production model, powered by 72% renewable energy. This dedication to responsible energy use earned us the ISO 50001 certification for Energy Management Systems in 2024.

# Zero carbon footprint manufacturing — powered by 100% electric kilns

At ONIX, we are deeply committed to reducing our carbon footprint. In 2024 alone, the sustainable practices implemented at our plant prevented over 1.6 million kilograms of CO<sup>2</sup> emissions. This achievement not only benefits the environment but also represents a meaningful step toward driving sustainability across the industry.

\* in our plant

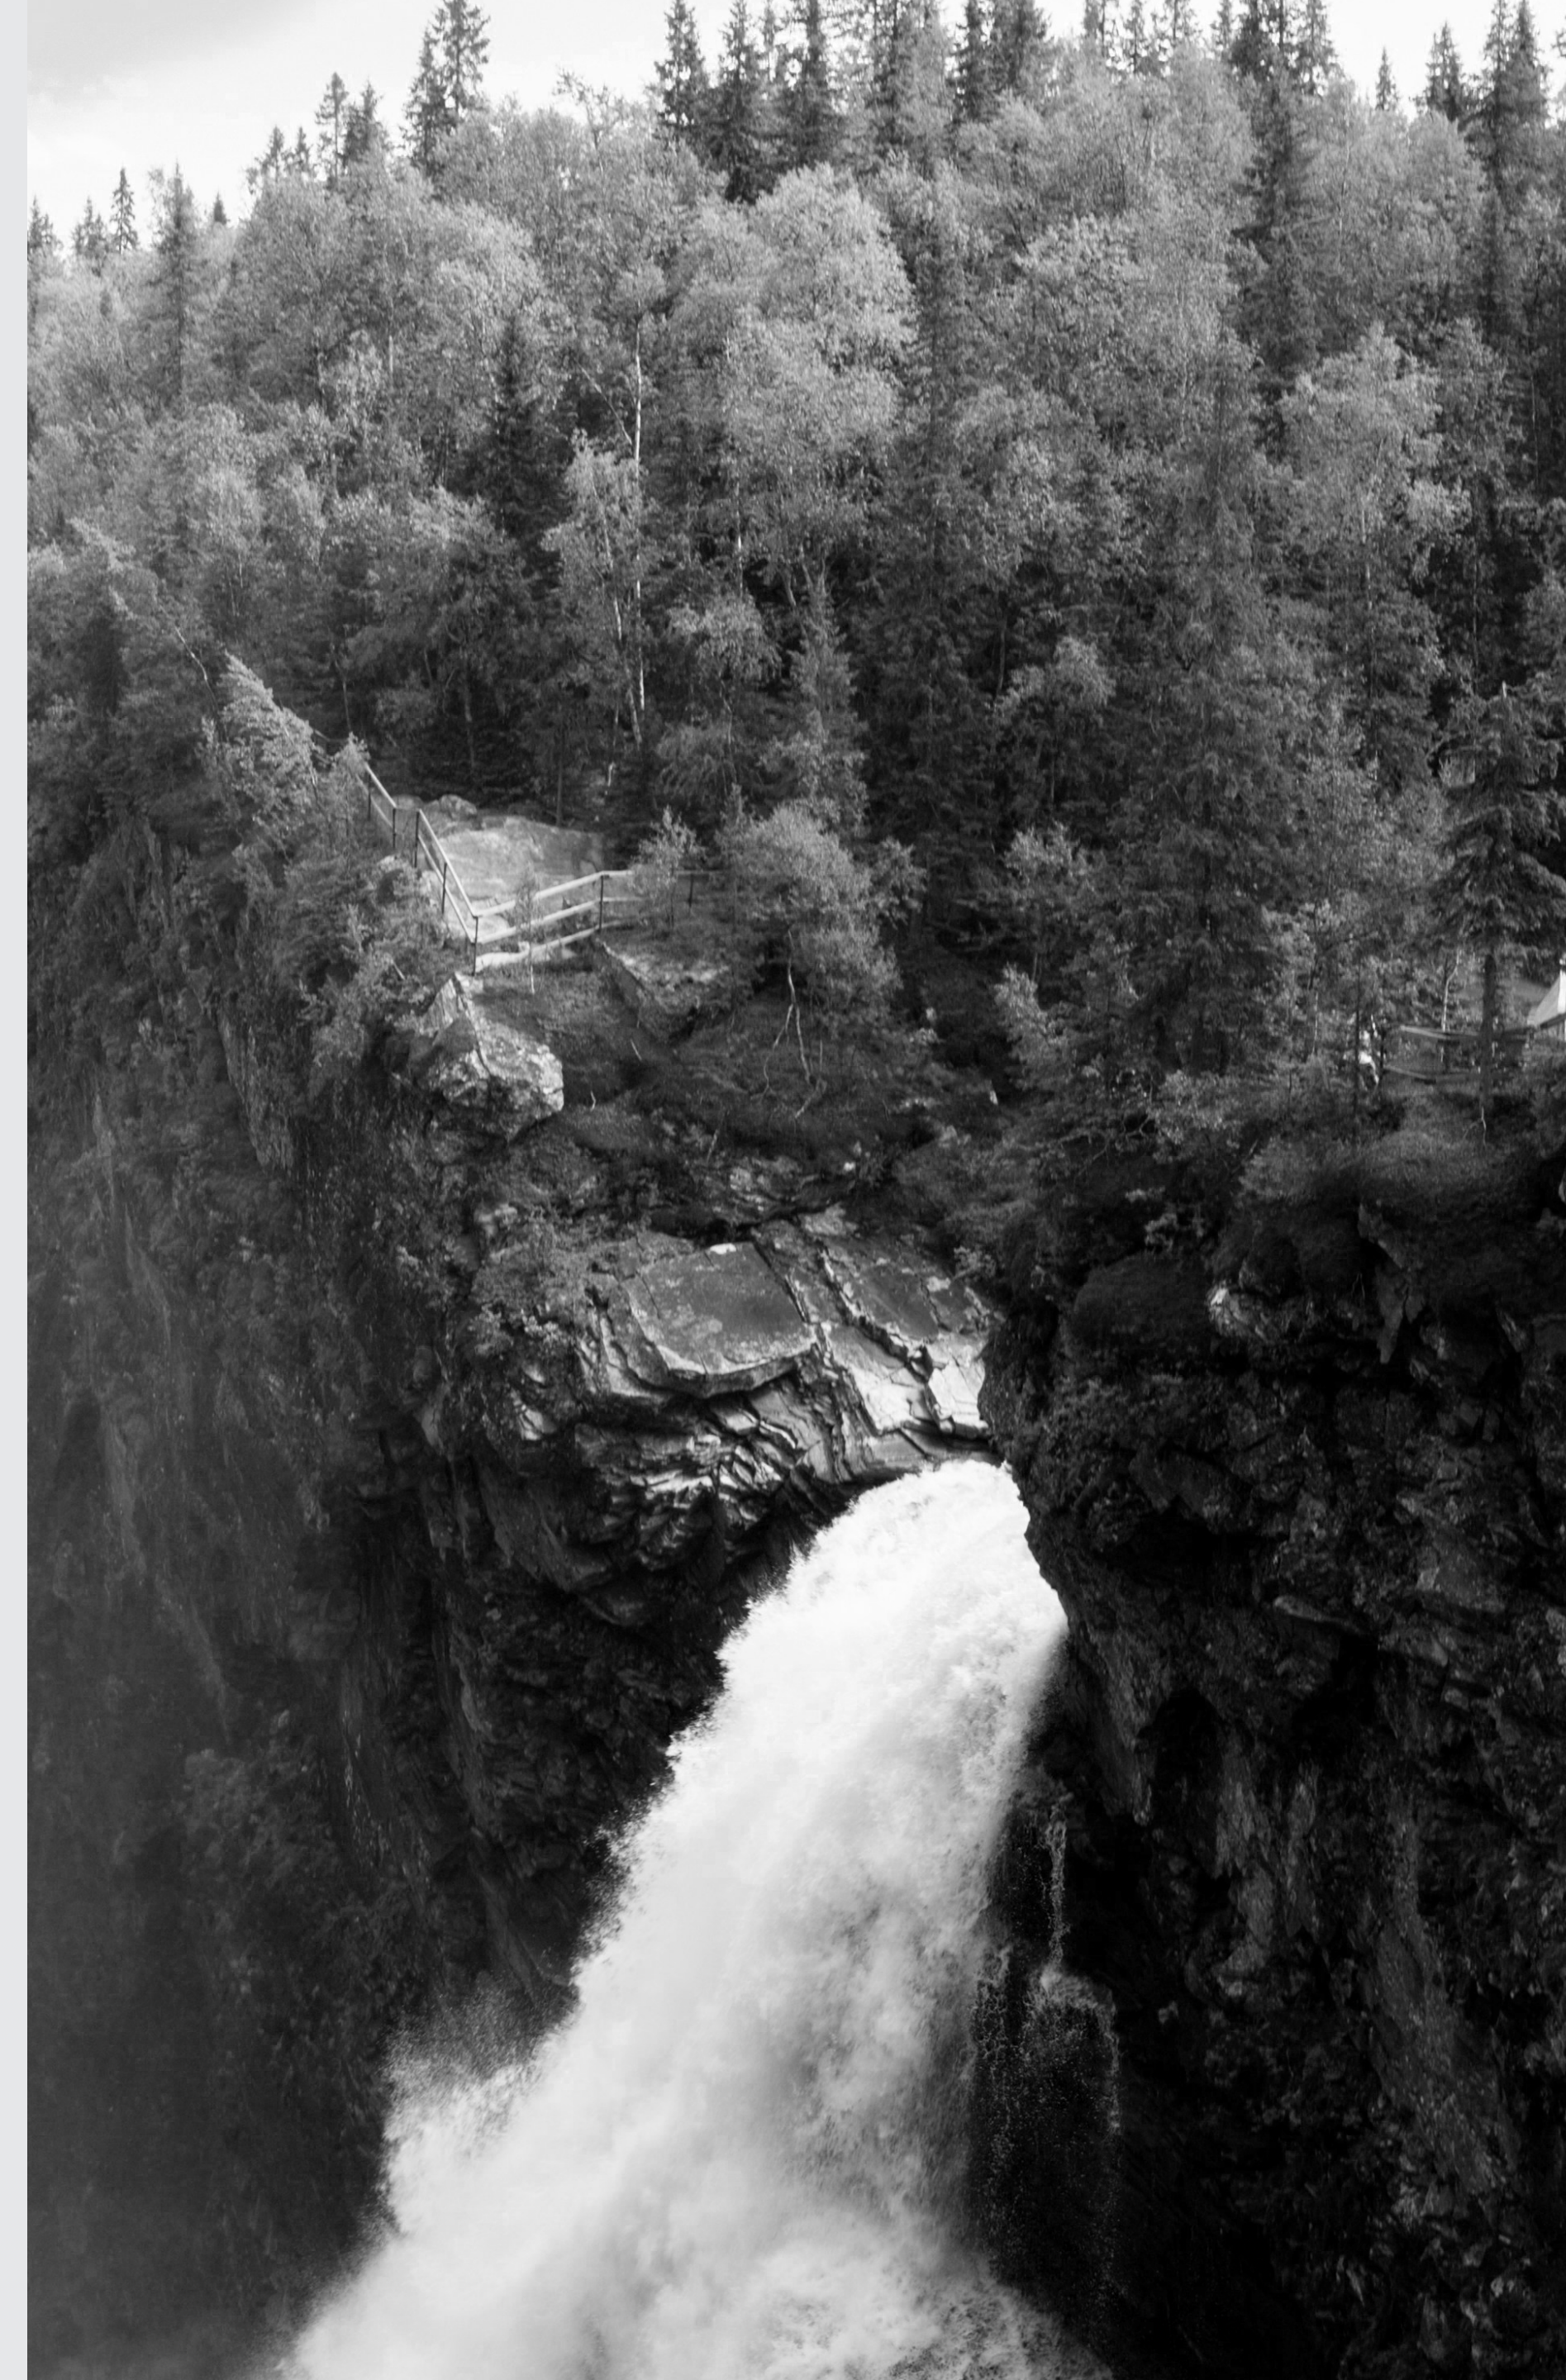

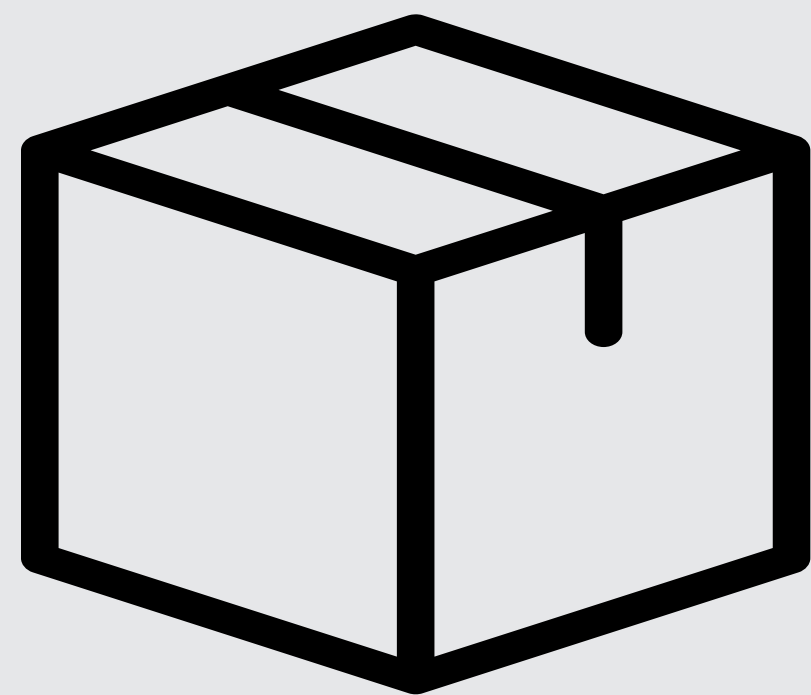

# Water-free manufacturing, Zero industrial discharge

We take pride in a production process that requires no water, helping conserve this vital resource while entirely eliminating waste and environmental pollution.

# Packaging

Sustainability is built into every detail – even our packaging. Made from fully recycled and recyclable materials, it reflects our commitment to the circular economy. By partnering with FSC-certified suppliers, we also champion responsible forest management and eco-conscious sourcing.
